PROBLEMS

Unknown Problems

RESULTS

Test	Value / Unit	Interpretation	Reference Range
CT Head or Brain without ContrastCollected: 10/11/2019 12:38 AM			
IMP	See note	Normal	
Unremarkable CT of the brain.			
NAR	See note	Normal	
HISTORY: Minor head trauma COMPARISON: There are no prior relevant studies available at this time. TECHNIQUE: Helical CT scans from the skull base through the vertex. Images reformatted coronal. Automated dose control measures were utilized. FINDINGS: Brain and dura: There is no evident mass, hemorrhage, recent infarct or extra-axial collection. There is no acute or significant focal intracranial abnormality. Skull: There is no significant skull or scalp abnormality identified. Sinuses and Orbits: The paranasal sinuses and mastoid air cells are clear. Minimal left preorbital soft tissue swelling is suggested. There is no orbit lesion appreciated.			
PXN	See note	Normal

<p>Roberts, David A, MD - 10/10/2019, Formatting of this note might be different from the original. HISTORY: Minor head trauma COMPARISON: There are no prior relevant studies available at this time. TECHNIQUE: Helical CT scans from the skull base through the vertex., Images reformatted coronal. Automated dose control measures were utilized. FINDINGS: Brain and dura: There is no evident mass, hemorrhage, recent infarct or extra-axial collection. There is no acute or significant focal, intracranial abnormality. Skull: There is no significant skull or scalp abnormality identified. Sinuses and Orbits: The paranasal sinuses and mastoid air cells are, clear. Minimal left preorbital soft tissue swelling is suggested. There is no, orbit lesion appreciated. IMPRESSION: Unremarkable CT of the brain.</p>			
n/a	7	Normal	
CT Facial Bones without ContrastCollected: 10/11/2019 12:47 AM			
IMP	See note	Normal	
Left nasal fracture.			
NAR	See note	Normal	
<p>HISTORY: Left-sided facial trauma with headache COMPARISON: There are no prior relevant studies available.. TECHNIQUE: Helically acquired thin section axial CT scans were performed with coronal images reformatted from the axial data set. Automated dose control measures were utilized. FINDINGS: There is a minimally displaced/depressed fracture of the left nasal bone resulting in cortical offset measuring 1 mm. No other facial fracture is seen. There is mild left preorbital soft tissue swelling. The globes and orbits are within normal limits; no retrobulbar hemorrhage. No sinus air-fluid level or hemorrhage is identified. There is mild mucosal thickening in the inferior right maxillary sinus and within the ethmoid air cells.</p>			
PXN	See note	Normal

HISTORY: Left-sided facial trauma with headache COMPARISON: There are no prior relevant studies available.. TECHNIQUE: Helically acquired thin section axial CT scans were performed, with coronal images reformatted from the axial data set. Automated dose, control measures were utilized. FINDINGS: There is a minimally displaced/depressed fracture of the left nasal bone resulting in cortical offset measuring 1 mm. No other facial fracture is, seen. There is mild left preorbital soft tissue swelling. The globes and orbits, are within normal limits; no retrobulbar hemorrhage. No sinus air-fluid level, or hemorrhage is identified. There is mild mucosal thickening in the inferior, right maxillary sinus and within the ethmoid air cells. IMPRESSION: Left nasal fracture.</p>			
n/a	7	Normal	
CT Cervical Spine without ContrastCollected: 10/11/2019 12:49 AM			
IMP	See note	Normal	
No cervical fracture or dislocation. Degenerative changes, most prominent at C5-6.			
NAR	See note	Normal	
<p>HISTORY: Trauma COMPARISON: There are no prior relevant studies available. TECHNIQUE: Axial images were obtained from the skull base to the thoracic inlet. Sagittal and coronal reformatted images were generated and reviewed. Automated dose control measures were utilized. FINDINGS: The vertebral bodies are normally aligned. The vertebral body heights are preserved. There is no evidence of acute fracture. No focal suspicious osseous lesion is identified. Evaluation of the spinal canal and spinal cord is intrinsically limited on this modality. Disc space levels: There is severe discogenic narrowing and moderate reactive endplate spurring at C5-6. There is milder discogenic narrowing/spurring at C4-5. There is prominent right-sided uncovertebral disease at C3-4 resulting in bony foraminal stenosis. Areas of mild bilateral diffuse facet arthrosis are present. The paravertebral soft tissues are unremarkable. Visualized portions of the brain and calvarium are unremarkable. The visualized lung apices are clear.</p>

ENCOUNTERS

Type	CPT Code	Date	Location	Provider	Indications
Emergency		10/10/2019 07:01 PM - 10/10/2019 09:11 PM	Voorhees Emergency Department 100 Bowman Drive, Voorhees, NJ 08043	Douglas Stranges	81639003 : null
Closed fracture of nasal bone, initial encounter (Primary Dx)					

Type	CPT Code	Date	Location	Provider	Indications
Office Visit	MG1030	10/14/2019 07:45 AM - 10/14/2019 08:42 AM	Otorhinolaryngology - PMWS 800 Walnut Street, Floor 18, Philadelphia, PA 19107	James Kearney	81639003 : null
Closed fracture of nasal bone, initial encounter (Primary Dx)					

PLAN OF CARE

- 1. 07/05/1974 - TDAP Vaccine
- 2. 07/05/1981 - Annual BMI Assessment
- 3. 07/05/1981 - Hepatitis C Screening
- 4. 07/05/1981 - Provide Tobacco Cessation Counseling
- 5. 07/05/1981 - Td Vaccine
- 6. 07/05/1981 - Tobacco Screening
- 7. 07/05/2013 - Colon Cancer Screening
- 8. 07/05/2013 - Zoster Vaccines (1 of 2)
- 9. 09/01/2022 - Influenza Vaccine (Season Ended)
- 10. 07/05/2028 - Pneumococcal PPSV23 Low Risk Adult (1 of 2 - PCV13)

- 1. 07/05/1963 - COLONOSCOPY
- 2. 07/05/1963 - COMBO COLO Topic NEW
- 3. 07/05/1963 - CT COLONOGRAPHY Q 5 years
- 4. 07/05/1963 - FIT/FOBT Q 1 Year
- 5. 07/05/1963 - FLEXIBLE SIGMOIDOSCOPY Q 5 years
- 6. 07/05/1963 - HEPATITIS C SCREENING
- 7. 07/05/1978 - HIV SCREENING ONCE
- 8. 07/05/1981 - COLOGUARD Q 3 YEARS
- 9. 07/05/1981 - LIPIDS
- 10. 07/05/1982 - DTAP/TDAP/TD (1 - Tdap)
- 11. 07/05/2008 - Diabetes Screening
- 12. 07/05/2013 - PSA COUNSELING
- 13. 07/05/2013 - ZOSTER VACCINES (1 of 2 - RZV, Shingrix)
- 14. 09/01/2021 - INFLUENZA (#1)
